IT PROJECT AGREEMENT

Project Overview

	Detail Description
Project Name	Online Cosmetics Ordering System
Customer	Manager
Team	DRM
Date of Agreement	October 2026

Development Team "DRM" Roster:

- Usenadinova Dilaram: Team Leader & Project Manager
- Baxtiyorova Ruxshona: Information Analyst & Web Content Designer
- Ergasheva Madinabonu: AI Strategist & Data (Google Sheets) Specialist

1. Project Purpose

The purpose of this project is to create a website that helps the customer solve a specific business problem and improve their business process. Specifically, the website addresses the lack of a single, professional online presence for Zetmart_uz, scattered product information, slow manual handling of customer inquiries and orders, and limited visibility of product data, by establishing a clean, mobile-friendly online storefront whose product and inquiry data are stored in an organized, easily updated Google Sheet.

2. Project Scope

The development team will build the website using a no-code approach with AI assistance. The following tools and main functions are included:

- Website creation with AI using Google Sites, with project files and version history managed on GitHub.
- Google Sheets as the data source (product catalog, prices, availability, customer inquiries and order requests).
- Categorized product catalog (skincare, makeup, hair care, fragrance, etc.) with product photos, descriptions and prices.
- Product search and category browsing.

- Order request / customer inquiry form that automatically records entries in Google Sheets.
- Contact, delivery information, and social media links pages.
- Responsive design that works on phones, tablets, and computers.

Functions or services not listed above (for example, online payment processing, custom-coded back-end systems, mobile apps) are outside the current project scope.

3. Customer Requirements

The customer requests the following major requirements:

- Attractive, easy-to-use website that reflects the Zetmart_uz brand.
- Product catalog that the shop manager can update easily through Google Sheets without coding.
- Automated recording of customer inquiries and order requests (date and time, customer name, phone, products, quantity, status).
- Mobile-friendly experience, since most customers browse from their phones.
- Clear contact and delivery information.

The development team will analyze these requirements and design the website based on the customer's needs.

4. Project Deliverables

The development team will provide the following deliverables:

- **Website:** Zetmart_uz online cosmetics shop website built with AI and Google Sites.
- **Data:** Google Sheets workbook for products, categories, and customer inquiries/orders.
- **Project Documentation:**
  - Contract (this Project Agreement)
  - Use Case Diagram
  - Business Process Model (BPM)
  - Work Breakdown Structure (WBS)
  - Gantt Chart
  - GitHub repository with project files and a short user guide for the shop manager

5. Schedule and Responsibilities

Timeline

- Project Start Date: October 2026
- Expected Completion Date: December 2026

Customer Responsibilities

- Explain business needs and requirements.
- Provide necessary information, product lists, prices, photos, logo, and brand materials to the development team.
- Review and give timely feedback on project milestones.

Development Team Responsibilities

- Analyze customer requirements.
- Design and build the website and its Google Sheets data structure.
- Communicate regularly with the customer during the project lifecycle.
- Deliver the agreed project results and documentation.

6. Budget

Academic Project / Non-commercial Capstone ($0.00 / Internal Allocation)

7. Changes to the Project

If the customer requests major changes to the requirements or project scope, the customer and development team will discuss and agree on the changes before implementation.

8. Agreement and Approval

Both the customer and the development team agree to cooperate in good faith and work toward completing the project according to the agreed requirements and schedule.
